About the role
Join CloudFactory's engineering team to build reliable APIs and backend services that power human-in-the-loop AI. You'll work with product and data teams to turn complex workflows into thoughtful, scalable solutions.
What you'll do
Build and maintain backend services with Python and Django.
Design REST APIs and optimize PostgreSQL queries.
Write well-tested code and collaborate through code reviews.
Support cloud deployments and improve service reliability.
What you'll bring
3+ years of experience building production backend systems.
Strong Python, Django, REST API, and relational database skills.
Comfort with Git, Docker, and automated testing.
Familiarity with AWS and CI/CD pipelines is a plus.
